

Wireframe Usage Rule: For Reference Only

Do not replicate the exact layouts provided in the wireframes.

The wireframes provided are strictly a structural guide to ensure all functional requirements are met. They represent the *skeleton* of the website, but you are responsible for designing the *skin and soul*.

Here is exactly how you should interpret and use the provided wireframes:

- **For Content and Flow Only:** Use the wireframes to understand what information must be present on each page (e.g., event rules, speaker bios, schedule) and how the user should navigate from one section to another.
- **Complete Creative Freedom:** As outlined in the PRD, you have complete authority to decide the website's visual identity, colour palette, typography, layout, animations, and overall UX. You are highly encouraged to break away from the traditional boxy layouts shown in the mock-up.
- **Interpret the Theme:** The tagline is "Where Ideas Become Innovation". Since this is being built for the GEHU campus crowd, we want a design that resonates with engineering and tech students. Think about creating a unique aesthetic—whether that is a dark-mode cyberpunk theme, a clean minimalist aesthetic, or a vibrant 3D interface.
- **Innovate the User Experience:** Do not just build static blocks of text. The PRD requires interactive elements, meaning you should introduce hover states, scroll animations, or creative navigation menus that elevate the basic wireframe structure into an engaging digital experience.
- **The Judging Impact:** Remember that "Visual Design & Aesthetics" (25 points) and "Creativity & Originality" (20 points) combined make up nearly half (45%) of your total evaluation score. Submitting a project that looks exactly like the Gray-and-white reference wireframes will result in a low score in these major categories.

The Bottom Line: If your final submitted website looks like a 1:1 copy of the wireframe, you have missed the point of the design challenge. Use the wireframes for the *what*, but show us your skills in the *how*.

Building on your excellent first rule, here is a structured list of guidelines

Flow 1: The Main Registration Journey

This is the primary path for a user who wants to explore what the fest has to offer and then secure their general admission ticket.

- **Step 1:** Start at the top **Navigation Panel** and click on **Home**.
- **Step 2:** On the main screen, click the **Explore Events** button.

This will scroll the user smoothly down to the "Events" to see what is happening.

Step 3: Once the user is ready to commit to the fest, they click the primary **Register** button (located either next to "View Details" or in the banner at the top of the page as **Register Now**)

Step 4: The **General Registration** form opens, allowing the user to input their contact details, college name, and select their events from a dropdown menu.

Flow 2: The Specific Competition Journey

This is the path for a user who wants to read the rules for a specific technical challenge (like a hackathon or coding tournament) before signing up their team.

- **Step 1:** From the **Home** page, scroll down to the "Featured Events" section.

- **Step 2:** Click the **Details** button inside one of the specific event cards (for example, the competitive programming event).
- **Step 3:** The dedicated **Event Page** opens, displaying the specific timeline, prize pool, eligibility requirements, and strict rules.

Competitive Programming

CodeRush

Test your algorithmic skills and speed in the ultimate competitive programming showdown. Solve complex problems under pressure and claim the top spot.

Prize Pool	Team Size
₹15,000	1-2
Fee	Date & Time
₹100	Oct 15, 10:00 AM
Venue	
📍 Lab 3, Main Building

About the Event

CodeRush is the premier competitive programming event of NIRVAN '26. It challenges participants to solve algorithmic problems using C, C++, Java, or Python. The event is designed to test logic, optimization skills, and coding speed. Participants will face a series of increasingly difficult problems on a custom judge platform.

Eligibility

- Open to all undergraduate students.
- Participants can register individually or in teams of two.
- Valid college ID required on the day of the event.

Rules

- Duration: 3 Hours.
- Platform: HackerRank (Link will be provided).
- Internet access is restricted to the competition platform only.
- Use of mobile phones or external storage devices is strictly prohibited.
- Plagiarism will result in immediate disqualification.
- Scoring is based on the number of test cases passed.
- In case of a tie, time taken to solve will be the tie-breaker.
- The judges' decision is final and binding.

Ready to Code?

Secure your spot in CodeRush before registrations close.

Flow 4: The Schedule & Filtering Journey

This path allows students to plan their exact itinerary and filter out the noise so they only see the events they care about.

- **Step 1:** In the top **Navigation Panel**, click on **Schedule**.
- **Step 2:** The user arrives at the main timeline. They can click the **Day 1** or **Day 2** toggle buttons at the top left of the schedule container to switch between the daily agendas.
- **Step 3:** To narrow down the list, the user clicks the **Tech** or **Design** filter buttons on the top right. This instantly sorts the view to only display events tagged with that specific category.

Flow 5: The Speaker Discovery Journey

This flow allows users to see who is talking and when, without getting lost on the site.

- **Step 1:** Go to the top **Navigation Panel** and click on **Speakers**.

Browse the grid of guest experts.

- **Step 2:** Click **View Profile** under a specific person's name.

The **Speaker Biography** page opens, detailing their background and the exact sessions they are running.

- **Step 3:** To leave this page, the user clicks the <- **Back to Speakers** link at the top left to return to the directory.

Dr. Alice Chen

Chief AI Scientist, NextGen Tech

BIOGRAPHY

Dr. Alice Chen is a leading researcher in the field of Artificial General Intelligence (AGI) and machine learning systems. With over 15 years of experience bridging academic research and industry applications, her work focuses on developing robust, interpretable neural architectures that can operate effectively in resource-constrained environments.

Prior to her role as Chief AI Scientist at NextGen Tech, Dr. Chen led the deep learning research group at the Global Institute of Technology. She holds a Ph.D. in Computer Science from MIT, where her dissertation on "Efficient Inference in Sparse Networks" received the university's highest honors.

At NIRVAN '26, Dr. Chen will be discussing the future of edge computing AI and how decentralized models are shaping the next generation of smart devices.

Sessions Schedule

Time & Date	Session Title	Location
Day 1 09:00 AM - 10:00 AM	Keynote: Opening Ceremony Official inauguration of NIRVAN '26.	Main Auditorium
Day 1 10:00 AM - 01:00 PM	CodeRush Tournament Competitive programming challenge.	Computer Lab 1
Day 1 11:00 AM - 12:30 PM	Tech Quiz Testing your knowledge across domains.	Seminar Hall A
Day 2 02:00 PM - 05:00 PM	UI/UX Arena Design sprint for creative problem solvers.	Design Studio
Day 2 04:00 PM - 07:00 PM	RoboWar The ultimate battle of mechanical engineering.	Outdoor Arena
Day 2 06:00 PM onwards	HackSprint Overnight development marathon.	Innovation Hub

Flow 6: The Sponsor Engagement Journey

This flow is designed specifically for external partners, businesses, or organizations looking to fund or support the technical fest.

- **Step 1:** In the top **Navigation Panel**, click on **Sponsors**.
- **Step 2:** The user scrolls through the tiered layout, viewing the empty placeholders for the Title Sponsor, Gold Sponsors, and Community Partners.
- **Step 3:** At the very bottom of the page, interested partners click the **Download Prospectus** button. This action will trigger a download of a PDF document detailing the sponsorship packages and benefits.

Flow 7: The Historical Gallery Journey

This path is for building excitement and showing prospective attendees what the fest environment actually looks like.

- **Step 1:** In the top **Navigation Panel**, click on **Gallery**.
- **Step 2:** The user lands on the "NIRVAN THROUGH THE YEARS" page, displaying a grid of past moments (like robotics events or keynotes).
- **Step 3:** The user clicks the left and right **Arrow Icons** (located just above the image grid on the right side) to navigate through the carousel and load older photos.
